Speciality (Neuro , Ortho ...) : \_\_\_\_\_

Do you treat other problems than spinal ones ? \_\_\_\_\_

Which Ones : \_\_\_\_\_

Which spinal conditions do you treat (degenerative, deformity, tumor, infection, trauma) ? : \_\_\_\_\_

Which level do you usually treat (cervical, thoracic, lumbar) ?

Do you use minimally Invasive Techniques ? \_\_\_\_\_

Which ones ? \_\_\_\_\_

How many spinal operations do you usually perform in a week?

Have you already used endospine ? \_\_\_\_\_

# INVITATION

**PROF. JEAN DESTANDAU'S**  
( M.S MCh NEURO SURGERY )

**DR SHRINIVAS ROHIDAS**  
( M.S MCh NEURO SURGERY )

Dear Colleagues,

Endoscopic surgery is one of the most innovative applications in the field of surgery. It has efficaciously permeated in all the branches of surgery. It is recognized as a safe, effective and patient-friendly treatment modality that has numerous advantages to name a few smaller incision, less pain, less hemorrhage, shorter recovery time etc. But it also requires skill and safe hand for the procedure to be successful.

The advent of 3D endovision system has added a new feather in the surgeons operational experience. Exact depth perception inside the human body is essential for any endoscopic procedure. The new 3D system offers the surgeon excellent depth of field combined with outstanding hand-eye coordination. It's valuable for activities that demand high degree of spatial perception.

## **DR ROHIDAS'S CENTRE FOR MINIMALLY INVASIVE SPINE AND NEURO SURGERY**

Along with BIO SKILL LAB,

**DEPARTMENT OF ANATOMY D Y PATIL MEDICAL COLLEGE**

Are immensely delighted to announce.

**3<sup>rd</sup> 3D SURGICAL WORKSHOP & 3D CADAVERIC WORKSHOP ON  
PROF. DESTANDAU'S TECHNIQUE IN ENDOSCOPIC SPINE SURGERY in  
KOLHAPUR.**
